

3D PP Non-woven box, Loop Handle bag making machine

Detailed Product Description

PP Non-woven fabric bag making machine (D cutting, U cutting, W cutting, Box Bag, Loop Handle)

- 1-computer control
- 2-automatic correction

Features:

In the process, the machine takes non woven fabric as raw material. This machinery can produce non woven bags of various sizes and shapes, including D cutting flat bag, T-shirt bag, handle loop bag.

Characters:

This machine is electro mechanical integrative, once through fully automatic forming, touch screen operation is applied, photo electric trace, computerized deviation rectifying function, hence accuracy and smooth. Such automatic devices as slotting device, punching device and metering device are equipped. Finished products are produced at fast speed, in high efficiency, and in firm appearance after welding. This machinery is an optical choice for the nonwoven bag making enterprise and businessmen devoted to the production of nonwoven environment friendly bags.

- 1, local touch-screen computer configured to operate;
- 2, arbitrarily set a long-step electric track, a smooth, lost support from the standard parking
- 3, feed off automatic shutdown, auto-punch;
- 4, while at the end of the roll-ultrasonic welding, in particular, solid, smooth;
- 5, automatic temperature and automatically correcting leaks;
- 6, while cutting edge automatic closure, automatic nesting.

Type	ONL-A600-700	ONL-A800
Production speed	20-120pcs/min	20-120pcs/min (High Speed Mater on Bag Type)
Bag width	100-800mm	100-800mm
Bag length	200-600mm	200-700mm
Bag making thickness	30-85 G.S.M	30-120 G.S.M
Power supply	380V/220V	380V/220v
Total power	12KW	13KW
Overall size	8000*1900*1800mm	8000*2200*1800mm
Price	28,80,000/-INR	31,85,000/- INR
(Price for without loop handler)	18,60,000/- INR	25,80,000/- INR
