

Automatic cutting and sewing machine

Price: 4,50,000/- INR

Sewing part

nearly finished machine

Performance and Characteristics

1. It can automatically accomplish the fixed-length thermal cutting and the bottom hemming for the woven cloth in roll, which saves labor forces.
2. It adopts the servo motor to drive, and the optical code meter to count the length, which precisely controls the length of bags.
3. After the heat cutting, the plackets of bags are easy to open, not conglutinated.
4. Pneumatic up-coiling, the operation is convenient.
5. Newlong brand sewing machine (Japan)
6. Siemens brand touch screen

Main Technical Parameters

Machine Type	SCD1200X800
Diameter of Unwinding Cloth	1500mm
Width of Unwinding Cloth	400~900 mm
Cutting Length	600~1200 mm
Length Accuracy	±1mm
Bottom Folding Width	20~30mm
Stitch Length	7~12 mm
Production Output	30-40pcs/min
Main Driving Motor	1.8kw
Power Required	7.0kw
Using Power	< 5.0kw
Dimension (L×W×H)	5000×3400×1200mm ("L"shape)
Weight	2200 kg
