Cement Bag Making Machine 24,200/- USD CIF Price.

Packaging & Delivery

Packaging Detail: Load directly or wood case

Delivery Detail: 20-60days

Specifications

Automatic Cement Bag Making Machine

Make valve type cement bag, valve-making, printing and cutting machine

The machine is combined woven sacks making machine unit with the functions of cutting, folding & notching on the shape of "7" or (normal flat) crack automatically. The machine would be a laminating machine unit after equipped with the laminating machine of type SJFM-Z 90x28. The new lamination machine unit can finish the processes from the woven roller to the sacks, including laminating, printing & cutting continuous operations.

The machine unit held the higher degrees of automation there are some merits of the machine unit, such as: increasing the output of production, printing clearly, easy to operating and so on. There are the ripe experiences on the technologies of both manufacturing & operating of the machine unit.

Packaging & Delivery

Packaging Detail: 1.Bottom: composite material pallets 2.Machine Outside:waterproof film cover the machine ,then cover a waterproof fabric on the cement bag making machine 3.The whole machine will be loaded into a Large wooden cases before load into the container 4.Attached Accessories will be load into a small wooden case in the container

Delivery Detail: 30-45days After getting Deposit Or The L/C documents

Specifications

paper bag making machine price 1.Competitive Price 2.Good service 3.Professional Research & Development team

Plastic-Paper Bag Making Machine Price

Product

Buyer reading:

Thanks for noting this , In order you to find the ideal machinery , Please tell us the bag you want to make ,or the material you will use when you send us the quotation..This can save you a lot of time ,kindly understand it.

Usage:

- (1)Laminating PP Woven Cement Bag.
- (2)Laminating Paper-Plastic Woven Cement Bag.
- (3)PP Woven+Film Cement Bag.

(4) 3 Layers Paper+Plastic Film+PP Woven Bag

Machine Features:

(1) This line adopt double-die head plastic extrusion laminating machine to laminate PP woven roller.

Laminating type: PP Woven fabric single side or double side laminating. Paper-Plastic laminating ,Plastic-PE laminating, also can laminate colorful OPP.CPP film.

High adhesive strength , Uniform fastnese ,No central joint sewing adhesive ,avoid the bag broken from weak strength of central joint sewing structure.

(2)Each part in this product process equipped with advanced electronic components, and magnetic powder tension control system and machinery device ,achieve goal of single adjust and group control. Make high efficiency.

Three layers laminating capacity:50-70m/min.80000pcs bag/day.

Two layers laminating capacity:70-100m/min.100000pcs bag/day

(3)Reasonable production structure , easy to operate and control ,work steady and safe . No wear parts and very low maintenance workload.

(4)Low investment , quick effect , high rate of return , can recover the machine costs in the short term

(5) Adopt double die head laminating technology produce bag in one time , make the electronic power and labor cost low , Product Finished Rates high. Bag making cost is half of Raphe bag.

(6) This machine not only can make two/three layers (pp woven/film/paper) Chemical fertilizer bag(Urea),Chemicals bag,Feed bag, also can make beautiful designed food packaging bags such as High quality colorful Bopp-PP woven food packing bag..

(7) Equiped with new type extrusion die head.

Can laminating ultra-thin film (Below 3g/m²) .This can improve laminating bag intensity in same cost price. Or reduce bag cost price in same intensity bag.

MAIN TECHNICAL PARAMETER

Multi-color overprinting & Multi-color printing
Shift ruffled location can changeable

Traction clamping roll diameter 240mm
Cutting rotary body can cutting two bags in one turning, seven type mouth cutting , Flat knife cutting can changeable
Cutting length 760-840mm can changeable(other cutting length can custom made)
Line speed 10-90m/min
Max. output 35 million pcs/year
Traction motor power 5.5 kw
Heating power 3kw

Machine components:

1.Double work station unwinding device

2.Laminating Machine:

Our Service

1.Installation Services

Installation Services are available with all new machine purchases. We will provide the technical know-how for your operation smooth transition and support for installing, debugging, operation of the machine, it will indicate you how to use this machine well.

2.Clients Training Services

We can train your staff to use your film blowing equipment systems properly. It means that we offer Customers Training, teaching how to use the systems most efficiently and safely as well as how to maintain optimal operational productivity.

3. After Sales Service

We offer the Preventative Maintenance and After Sales Service. For we strongly feels about the importance of supporting our customers and the product solutions we provide. Consequently we offer comprehensive maintenance options to prevent equipment issues before they become problems. Also we offer one year guarantee period.
