Scrap Metal Block Forming Machine FOB 3000 \$ to 29000 \$

Packaging & Delivery

Packaging Details: Nude package or as your demand

Delivery Detail: 30days

Specifications

hydraulic briquette machine

- 1.hydraulic drive
- 2.stable operation
- 3.vibration-free
- 4.safe and reliable

hydraulic briquette machine for metal scrap fragment

Applications:

Such series are mainly used to extrude steel cutting, cast iron filing, copper scrap and aluminium scrap into high density cylinder bulk, in order to achieve convenient reclamation and easy refining ,especially, the extruded casting iron filing may substitute foundry iron.

Features:

- 1.Hydraulic drive, stable operation, vibration-free, safety, and reliability.
- 2.Requires simple equipment foundation
- 3.Adopts PLC automatic control and the users can select manual or automatic operation.

Technical Data:

Y83 Series Hydraulic scrap metal briquette machine					
Model	Oil pump	Power (KW)	Briquette block		
			Dia (mm)	According to iron(Fe)	
				Weight (Kg)	Density (T/m ³)
Y81-2000	63YCY	15	80	2.5~3	≧5
Y81-2500	80YCY	18.5	90-100	3~3.5	≧5.2
Y81-3150	100MCY	30	100-110	3~4	≧5.5
Y81-3600	100MCY	30	110-120	3.5~4.5	≧5.5
Y81-5000	160MCY	37	120-140	4~8	≧5.5-6
Y81-6300	250MCY	45	120-170	6~10	≧5.5-6

Service:

We are specialized in scrap metal recycling line with 15 more years experience with good public praise" quality and integrity" in this field" .There are more than 2000 scrap metal factories choose us. Besides, we also export the recycle machines to USA. Brazil. Mexico. Russian. Iran. etc. We are a manufacturer who can provide reasonable price, strict quality control, supply ability for 200 sets of production lines/annual production with perfect after sales service.
