

## High-speed packages sanitary pads making machine

Price: 13.5 L

Assembly Workshop

The main components

### Specifications

- 1:PLC and Touch screen control
- 2.Speed:350-400pcs/min
- 3:CE

### Main functions and features

- 1.Driving way: shaft rotation (this machine adopts frequency conversion motor, gear box, universal shaft, synchronous belt in transmission).
- 2.It can produce ultra-thin or fluffy pulp cotton core type sanitary napkin,which is fast-easy package.
- 3.It adopt PLC+Touchable screen+ frequency control system.
- 4.Main raw materials automatic splicing device. tension control device. PE film web guide system. unqualified parts will remove automatically. Production of automatic shutdown system failure.
- 5.Cutter material use 45 # steel, e\* tend life of the cutter.
- 6.Higher speed crusher machine can crush treated or untreated fluff pulp.
- 7.Touchable Screen: Motor switch on/off, running speed, time, counting pieces, parameter setting, alarm, error display,error enquiry (functions setting appear on screen are different according to different machine type).

Main Technical Parameters	
Model	HC-SNB
Designed speed	140m/min
Running speed	350-400pcs/min
Capacity	140kw 380V,50 HZ
Practical capacity	100kw Breaker: 400A
Electricity	3phases 4 lines
The lowest air pressure	>0.6mpa,1.3m3/min
Total weight	about 35Tons
Main machine overall dimensions	(L*W*H)(22*5*3)m
Machine taking total space	(L*W*H)(26*9*4)m
Container	2*40HQ
